

Operating Handle Hex Drive

Melron bronze architectural hardware is handcrafted from start to finish in our Central Wisconsin facility. The product you choose is cast in a sand mold, tumbled, machined and finished by our small group of skilled craftspeople. The texture of the sand grains used to make the mold give our hardware its unique characteristics.

Sand cast bronze hardware embodies strength, durability and beauty that is impossible to achieve any other way.

ALLOY AND FINISHES

This product pictured is the White Bronze alloy with the Natural finish.

Technical drawing showing the Operating Handle Hex Drive hardware. The drawing includes a side view and a front view. The side view shows a curved handle with a diameter of 0.234" and a length of 1.400". The front view shows a hexagonal drive shaft with a diameter of 1/4" HEX. The front view also indicates that the handle is drilled out to fit tamper resistant locks, which is an optional feature.

PART NUMBER	DESCRIPTION
46977	TAMPER RESISTANT
46980	NOT TAMPER RESISTANT
